Oslo, 15 September 2017

**Invitation to participate at Health Data Analysis, Oslo 19 – 20 October 2017**

Dear Ms. Teodora Gandova,

We have the pleasure to invite representatives involved in the Bulgarian NGO links' EEA Grants supported project to the conference Health Data Analysis, that will take place 19 - 20th October at the Oslo Cancer Cluster, Oslo. The conference is organized by Tekna in partnership with Oslo Cancer Cluster and other contributors involved in Norwegian health R&D.

If you are interested, we can give you a 10-minute pitch in order to briefly present your project and explain what bilateral partners you seek.

We believe that the event will provide a good platform for meeting potential bilateral partners working with the challenges of accessing health data and applying new analytic tools. As partners or speakers there will be, among others, representatives from the Norwegian Directorate for eHealth, the Norwegian Institute for Informatics and Cancer Genomics, Oslo Cancer Cluster and the Norwegian Center for E-Health Research. There will also be a speaker from the Icelandic DeCode Genetics, which may prove relevant for you, as Iceland also is one of the contributors to the EEA Grants.

Among other issues, we will cover the National Health Data Program which aims to improve health data access, new use of the Norwegian Cancer Registry, the projects BigMed and DoMore which explore new opportunities to make use of health data for clinical purposes. We will also present a Danish and an Icelandic project that succeed at putting population data into clinical use. Generally, we will put a strong emphasis on the new opportunities of machine learning and big data and also present some innovation projects, startups and technology.

Best regards,

Arild Ulset
